

CHEVERUS

March 16, 2021

Dear Cheverus Community,

This morning we learned that a third member of our community has tested positive for COVID-19. Once again the person who has tested positive did have contact with other members of our community two days prior to the onset of symptoms, and so our contact-tracing team is working to identify and notify those people today. A school representative will call you directly if you are identified as a close contact; in the meantime we would ask that all members of our community continue to exercise the safe and responsible practices we have employed all year. As we did yesterday we will send another notice to all students and families once this contact-tracing process is complete. Thank you in advance for your patience and understanding as we complete this work to keep our community safe.

Peace,

John Moran
