

CHEVERUS

December 20, 2020

Dear Cheverus Community,

This weekend we learned that a second member of our community has tested positive for COVID19. The person who has tested positive is asymptomatic, and so we have followed the CDC's guidance for contact-tracing of asymptomatic individuals which traces back two days prior to the testing date (Wednesday, December 16). Using this guideline we have identified any individuals who were present in the same room/classroom as the person who tested positive. A school representative will contact you directly if you are identified as a close contact; in the meantime we would ask that all members of our community continue to exercise the safe and responsible practices we have employed all year. Thank you in advance for your patience and understanding as we complete this work to keep our community safe.

Peace,
John Moran
